SUMMARY

Full-Stack Engineer with 5+ years of hands-on experience building scalable APIs, microservices, and AI-powered automation in fintech and high-traffic environments. Proven track record delivering production systems with clean architecture, from zero to deployment. Specialized in complex integrations, data processing, and critical workflow automation. Increasingly focused on practical AI integration: building LLM-powered pipelines, AI agents, and prompt-engineered workflows using the Anthropic Claude API, LangChain, and Trigger.dev.

SKILLS SUMMARY

- **Backend:** Node.js, Express.js, Nest.js, Bun, Elysia.js, C#, .NET Framework, Kotlin (Spring Boot), Python, PHP (Laravel), SQL, NoSQL, Redis, Trigger.dev
- **Frontend/UI:** React, Next.js, Vue.js, TypeScript, Angular, Framer Motion, Tailwind CSS
- **AI & LLM:** Anthropic Claude API, LangChain, OpenAI API, Claude Code, Cursor, AI Agents, Prompt Engineering, OCR, Webhooks
- **Infrastructure:** Docker, Kubernetes, AWS (EC2, S3, Lambda, RDS), Azure Functions, Nginx, RabbitMQ, CI/CD (GitHub Actions), WhatsApp Business API (Meta)
- **Tools:** Prisma, GraphQL, Jest, Playwright, Git, Linux
- **Languages:** Portuguese (Native), English (Fluent), Spanish (Basic)

EXPERIENCE

Gearbank/Engrenna

São Paulo - BR - Dec 2025 - Present

Senior Software Engineer

- Architecting and leading migration of legacy .NET 4.8.1 MVC system to Bun + Elysia + Next.js, co-designing the new stack with the CTO
- Engineered end-to-end PIX payment pipeline with real-time reconciliation (BTG Pactual) for R\$120k-180k+ monthly transaction volume; resolved production Trigger.dev bug causing silent error swallowing in BTG webhook handling
- Integrated WhatsApp Business API with Meta-approved HSM template management for PIX payment notifications (Utility category)
- Built CARDADOS/SisConsulta vehicle data API integration for automated license plate and chassis lookups in the credit approval flow
- Developed AI-powered document analysis pipeline via Trigger.dev, using LLM inference to autonomously approve or reject submissions and eliminate manual CEO review bottleneck (5-10 min per document)
- Implemented provider failover architecture (ClickSign to ZapSign) eliminating single points of failure in digital signature workflows
- Built transactional communication infrastructure (Resend) automating customer notifications across CCB workflows
- **Technologies:** C#, .NET Framework, Bun, Elysia.js, Next.js, Trigger.dev, BTG PIX, WhatsApp Business API, LangChain, Anthropic Claude API, OpenAI API, OCR, ZapSign, ClickSign, Resend, SQL Server, Git

Globant - Neobrain

Paris - FR - Mar 2024 - Dec 2025

Software Engineer

- Designed and delivered €200K employee skill assessment platform using Node.js, TypeScript, and Vue.js
- Built and maintained backend APIs with Node.js and Express.js, handling high-traffic requests and ensuring system reliability
- Developed batch processing system with Node.js and PostgreSQL for multi-language service synchronization
- Collaborated with international team using Vue.js frontend and PHP/Symfony backend services
- **Technologies:** Node.js, Express.js, Vue.js, TypeScript, PHP, Python, WebSocket, Jest, HanaDB, Gitlab Actions

Alloy Mit Group São Paulo - BR - Jan 2023 - Mar 2024

Full Stack Engineer

- Led deployment of flagship project using Node.js backend services with Docker/Kubernetes, improving scalability and operational efficiency
- Integrated two accounting systems via Node.js APIs, automating payment processes and increasing financial productivity by 20x
- Built and maintained RESTful APIs using Node.js with Express.js and Nest.js for high-traffic applications
- Implemented CI/CD pipelines reducing deployment times and increasing delivery efficiency
- Developed reusable UI components with Next.js/React integrated with Node.js backends
- Mentored junior developers on Node.js best practices and architecture patterns
- **Technologies:** Next.js, TypeScript, Node.js, PHP Laravel, Docker, Redis, AWS, Nginx, Linux, Spring Boot Kotlin

Liqi Digital Assets

São Paulo - BR - Jan 2022 - Dec 2022

Backend Engineer

- Built financial transaction APIs using Node.js with Nest.js (Express.js-based), processing 120 invoices/minute with zero data loss
- Implemented RESTful and GraphQL APIs for fintech payment processing, ensuring ACID and security
- Developed cashback and referral systems that increased customer base by 5% and acquisition by 100%
- Worked on fraud prevention and security measures for cryptocurrency transactions
- **Technologies:** Node.js, TypeScript, Nest.js, Prisma, Postgres, Docker, GraphQL, Jest

EDUCATION

Mackenzie Presbyterian University

São Paulo, Brazil - Jan 2017 - Dec 2021

Production Engineering BEng

FIAP

São Paulo, Brazil - Aug 2023 - Jul 2024

Postgraduate Program in Software Architecture

PERSONAL PROJECTS

Mlsoftware.tech - Portfolio Website

- Developed personal portfolio with Next.js and multi-language support, deployed on Vercel with optimized SEO
- **Technologies:** Next.js, Tailwind CSS, TypeScript, Vercel, next-intl

AutoZappr.com - WhatsApp Automation Platform

- Built production-grade SaaS platform for WhatsApp message scheduling using microservices architecture
- Node.js/NestJS backend + Python/FastAPI services with PostgreSQL, Redis. Integrated Evolution API for WhatsApp, Stripe for payments, real-time message processing, OAuth authentication. Deployed with Docker and Nginx on VPS
- **Technologies:** Node.js, Express.js, Python, FastAPI, PostgreSQL, Redis, Docker, Evolution API, React, Nginx

Kieh540 Team - Freelance Web & E-commerce Redesign

- Redesigned and built full e-commerce platform for a Taekwondo sports brand: editorial rebrand, Nuvemshop store integration, and ProductCard components in Next.js + Framer Motion
- Produced structured Claude Code handoff documentation (CLAUDE.md / PLAN.md) for AI-assisted development workflow
- **Technologies:** Next.js, Framer Motion, Tailwind CSS, Nuvemshop, Playwright, Claude Code

Orgaut.ai - Document Processing SaaS

- Built and shipped AI-powered document processing platform with OCR pipeline, independently architecting and deploying the full system from scratch
